

Costimator[®]

CASE STUDY

Costimator - Final Puzzle Piece for Mattson/Witt Precision

The Challenge:

Because Mattson/Witt is so focused on the water treatment industry, they find themselves to be frequently overwhelmed by quote requests. Keeping up with the demand had become increasingly cumbersome – weighed down by the use of outdated manufacturing data and inconsistent methods.

The Solution:

The company needed something easier to use and more accessible for their employees. When reviewing Costimator, the Mattson/Witt team found exactly what they were looking for. Since Costimator was implemented, the Mattson/Witt team has been impressed with the results, finding that Costimator has helped fill a glaring need in their business.

With the old method... "Production staff had to run around after the parts were produced interviewing machinists to identify set up and cycle times. Finding out after the fact whether or not you made money is no way to run a business."

Kevin Graff, Mattson/Witt Precision Products, Inc.

The Client:

Mattson/Witt Precision Products, Inc. (Barrington, IL) is one of America's premier sources of custom manufactured plastic component solutions for the water treatment industry. With products like the first plastic brine valve, riser tubes and hub & lateral distributor systems for steel tanks, Mattson/Witt have become a go-to company for plastic component solutions.

The company offers a full range of capabilities and is able to economically produce high quality, custom runs in quantities of 1 to 10,000 pieces. Innovation in meeting customer requirements remains the cornerstone of their business. For over 50 years, they've built a strong reputation for their superior workmanship, service and fair prices.
